

IMPORTANT NEWS FROM THE HEALTH ROOM

State vaccination requirements for students entering Kindergarten for school year 2014-2015 have been revised. In addition to the previously required immunizations Kindergarten students are now required to have two doses of the Varicella (Chickenpox) vaccine.

Parents/guardians may obtain the required vaccinations and/or proof of vaccinations from their child's health care provider. Students may obtain the required vaccinations from the Frederick County Health Department if they don't have health insurance or insurance doesn't cover the cost of the vaccines.

If you have any questions about the new vaccination requirements, please contact your child's health care provider or the school health room.
