Parkway S.T.E.M. (Science, Technology, Engineering, Math) and Social Studies Fair

The S.T.E.M. and Social Studies Fair at Parkway Elementary will take place **Wednesday, March 25th**. All students are invited to participate, but taking part in the S.T.E.M. and Social Studies Fair is not mandatory. A student may select to create a S.T.E.M. project or a Social Studies Fair project. Students can also create a project for both if they are interested in doing so. When thinking about a project think about what you like to do or what you would like to learn about and start from there. Select a project that you would be excited about and you think others would find interesting to learn about.

Students can do a research-based project and share information about a topic of interest. It could also be a technology and engineering project where students come up with a new technology or modify an existing technology and students become the inventor. A Science Fair project could be experiment-based where the scientific method is used in their testing. A Social Studies Fair project could also be inquiry based that starts with a question you want to find out the answer to.

Those creating a Science & Engineering or Social Studies project may also choose to take part in the Frederick County Science and Engineering/Social Studies Fair on **Saturday, March 28th** at Tuscarora High School. The registration links will be on the Parkway website.

A guide for the Science & Engineering Fair and Social Studies Fair containing project ideas and ways to display projects will be available on the Parkway website.

Display boards will also be sold at our school store for $3.00.

No projects that harm living organisms will be allowed in the science fair.

Projects must be no larger than 5 feet high, 3 feet wide, and 2 feet from front to back.

If you are interested in participating in the S.T.E.M. and Social Studies Fair complete the section below and return it to your teacher by **Monday, March 2nd**.
