New Edmodo Feature!

May 1, 2012

You can now set your groups to be "moderated" much like you would with a blog.

To do this, when creating a new group, click the "+Advanced Options" button under the window for the group name.

This will expand your options so you can set the group so that all new members are read-only, and / or set the group so the teacher must moderate all Posts and Replies.

If you'd like to apply this feature to a group you've already created...
1. Click on the group's name
2. Choose Group Setting on the right
   ![Group Settings](icon)
3. Follow same instructions as above
